

# UPDATE RE: SANDFIELD DAM

Please be advised that at approx. 1:30pm April 17, 2026, the Ministry of Natural Resources (MNR) will be pulling 6 logs (from 4 different sections) of the Sandfield Dam at Lake Manitou.

This will affect the Manitou River and those residents who live alongside the river. The Roads Department is closely monitoring the situation and will be in contact with MNR as needed. Please use caution, obey all safety signage, and stay clear of the river and surrounding areas. The section of Michael's Bay Rd that is closed will remain closed, and no traffic is allowed on the road at this time (by residents or non-residents).

Please call **911** for an emergency, and call the Fire Hall for other questions or concerns **705-859-3287**
